# OTC MINI-TUNE TEST BENCH/ANALYZER

TE-3004D

**A complete, counter-sized test bench and analyzer for alternators, generators, and starters! This multi-featured, value priced tester will reduce customer comebacks, increase customer satisfaction, and improve your bottom line!**

- Alternator ripple sensor device for performing complete alternator testing.
- Lower scale (0-250) amps monitors the starter free-spin amperage.
- Operates on all 6- and 12-volt systems.
- 1/2 hp motor spins alternators and generators at 3,500 rpm. Operates both clockwise and counterclockwise.
- Control panel indicator lights let you monitor load, stator, diode/diode trio, alternator ripple, starter ignition, and low line voltage.
- Program switches let you select alternator/generator mode, A-B systems, positive-negative systems, and 6- or 12-volts.
- Energize switch and circuitry lets you test alternators built after 1985.
- A quick disconnect harness is included for the new CS late Ford and Nippondenso alternator test.
- Meter offers  $\pm 1\%$  accuracy with scales showing charging voltage of 0-22V when testing alternators and generators.
- Reduce warranty claims, identify faulty and good rotating electrical parts.
- Add value by providing customers with diagnostic results, sell the parts they need.
- Technical support is available. . .call
