SPX
SERVICE SOLUTIONS

OTC now offers the broadest selection of Bit Sockets on the market today. Hex, Ribe and of course TORX drive systems.

HEX – offered in both fractional and metric – common sizes. Hex profiles are one of the most common fasteners found in the automotive, industrial, and agricultural markets today. Our Hex Bit Socket Sets give service professionals a tool for application from bumper to bumper on millions of vehicles.

RIBE – Ribe profiles, sometimes called polydrive, are appearing everywhere and are becoming more popular everyday, especially where high torque fastening is required. Most common applications are with European vehicles such as Volkswagen, Fiat, Alfa Romeo, as well as others.

TORX – TORX, TORX Plus and Tamper Resistant TORX fastener profiles were introduced to improve manufacturing processes. These tools provide maximum engagement to reduce the chance of fastener and tool damage. Authentic TORX fasteners and drivers are manufactured to very critical, proprietary tolerances. Our bit sockets are produced with gauging that is available ONLY to licensed TORX Drive manufacturers. "Look alike" bit

sockets may be produced with inferior materials and may not meet the exacting specifications which can cause substandard engagement, fastener damage, or premature tool wear. Professional technicians trust specialty fastener tools with the TORX trademark, from OTC Tools.

All OTC Bit Sockets are manufactured with premium quality tool grade steel and are manufactured as two-piece construction for even stronger performance. These bit sockets give today's service professionals the ability to have the right tool required for applications using the most common specialty fasteners found in your shop – today.

Our new packaging is clearly labeled with the specific fastener design in order to give service and maintenance professionals the ability to easily identify the correct tool needed for any job. Our small sets have each drive size color coded and the convenient socket rail can be stored in a tool drawer, or hung on a pegboard. Our 52 Piece Master Set is the most comprehensive TORX set on the market today.

5900A – 52 Piece, Master TORX® Socket Set in a blow-molded case

5900A

Specially selected to cover hundreds of applications from bumper to bumper on cars and trucks:

- Seat belt bolts
- Interior and exterior trim screws
- Engine component fasteners
- Tail lamp lenses & assemblies
- Bumper bolts
- Headlight bezel screws
- Door strikers & latch fasteners
- Brake rotor bolts
- GM front-wheel drive front wheel bearing bolts
- Truck box bolts

Styles available:

TORX® bit sockets, TORX® PLUS bit sockets, Tamper-Resistant TORX® bit sockets, and External TORX® sockets.

Made from superior S2 steel to meet or exceed torque specifications.

No. 5900A – Master TORX® socket set. 52-piece set in blow-molded case. Wt., 7 lbs.

Master Torx® Socket Set includes:

Professional Grade “L Key” Sets from OTC

These specialty fastener L Keys are manufactured with premium grade S2 tool steel - for a long life of repetitive use.

Each wrench is marked with size for quick identification and is finished in Satin Chrome for professional appearance.

Each set carries the OTC Brand and contains 10 pieces of common sizes. We offer Hex, (both metric and fractional) Torx, Torx PLUS and Tamper Resistant Torx. The L Key holder is manufactured from high impact composite material and is designed to slide apart for easy tool access and storage, and displays size marking for easy identification.

The hang tab lets you choose to store these tools conveniently on a pegboard, or in your tool drawer.
