

CRIMPWELL™ ANGLED CRIMPING PLIER

Innovative Must-Have Tool

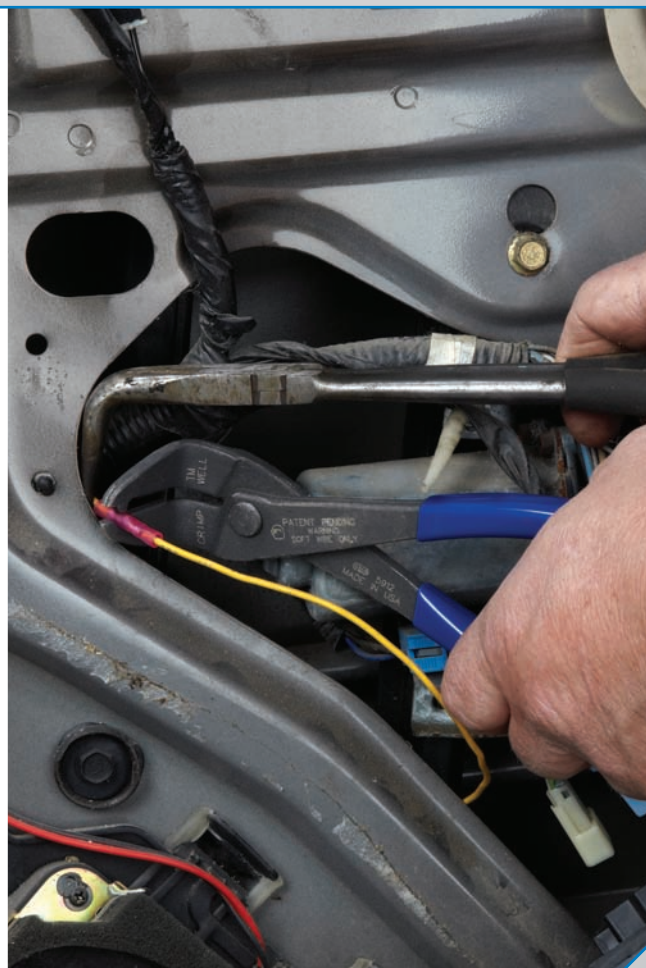

SIMPLIFY WIRE REPAIR in Hard-to-Reach Places

The 5912 Crimpwell™ Angled Crimping Plier from OTC is an innovative tool for crimping terminal or joint connectors to common soft wire. The design makes crimping connectors easier than ever – and is especially valuable where wire service is compromised by limited access.

FEATURES

- ✓ Universal crimping design accommodates soft wire – solid or stranded – 10-22 AWG.
- ✓ Cutting feature included for quicker preparation.
- ✓ 9" (228mm) in length, with protective grips to increase leverage and secure crimp.
- ✓ (Patent Applied For) Angled design keeps the connector, the wire, and the crimper "in-line" – improving visibility and access in hard to reach places.
- ✓ Designed to not pierce connector insulation and also works on un-insulated connectors.
- ✓ Service tech can use as much force as desired to ensure connection and it will not damage connector insulation.
- ✓ Easy-to-use:
Simply insert the connector into the crimping feature, slip over the connector and squeeze.
