# Complete YF service

## Why are manufacturers using R-1234yf?

Automakers receive CAFE credits for using the new refrigerant. Using R-1234yf helps them meet federal requirements for how far a vehicle must travel on a gallon of fuel.

## What do I need to service R-1234yf systems?

- › A new machine meeting SAE J2927 and J2843 standards; Robinair's AC1234-4 or AC1234-9
- › A new leak detector meeting SAE J2913 and J2791 standards; Robinair's LD3, LD5 or LD7
- › A syringe-type oil injector to inject oil back into the system; Robinair's 18465
- › Optional tracer gas leak detector to reduce cost searching for leak; Robinair's LD9-TG

## A new Leak Detector

Your existing leak detector may not recognize R-1234yf, meaning you may not catch an expensive refrigerant leak. Invest in one that meets SAE J2913 and J2791 standards.

- › LD3 leak detector automatic calibration and audible alerts
- › LD5 leak detector with bar graph mode and color display
- › LD7 premium leak detector with bar and pinpoint graphing modes

LD7 shown

## New Syringe-Type Oil Injectors

1234yf systems have different fittings and couplers, requiring a new syringe-type oil injector to put oil back into the system. Current SAE standards for 1234yf service does not allow automatic oil injection on a machine.

- › 18460 unlabeled 1234yf oil injector
- › 18465 PAG-labeled 1234yf injector for low-voltage systems in gas and diesel vehicles
- › 18470 POE-labeled 1234yf injector for electric and hybrid vehicles

18465 shown

### 80211TMP

#### Bluetooth temp probes master kit

- › Read and track temperatures from multiple locations from your A/C machine
- › Use up to 2 probes per compatible Robinair machine
- › Enables WiFi and Bluetooth capabilities on NI and AC1234-4 machines

### 80211VCI

#### VCI master kit + database

- › Enables WiFi and Bluetooth capabilities on NI and AC1234-4 machines
- › Wirelessly gather and transmit vehicle year, make and model info to your compatible Robinair machine
- › Includes current-year refrigerant capacity database to quickly determine correct refrigerant charge, oil type and oil capacity
- › Also reads generic OBDII codes to help troubleshoot A/C system issues

## What wireless accessories fit my machine?

Non-wireless A/C Machine			Wireless Enabled A/C Machine	
A/C Machine	VCI	Temp Probes	VCI	Temp Probes
34288NI, 34788NI, 34788NI-H, 34988NI	80211VCI	80211TMP	ACS-250*	80213 or 80212*

AC1234-4	80211VCI	80211TMP	ACS-250*	80213 or 80212*

All machines use 34724 filter and 13172 maintenance kit

\*Use of ACS-250, 80212 or 80213 on NI or AC1234-4 requires machine first be WiFi/Bluetooth enabled using either 80211TMP or 80211VCI master kit

\*\*Database purchase required for vehicle refrigerant capacity
