

Encore Release Notes

Version 1.4.2.5

Overview:

The new version 1.4.2.5 contains significant User Interface improvements in several critical areas. Many thanks for the useful feedback we are receiving. This release is a direct result of that feedback. More coverage and enhancements on the way!

User Interface Improvements:

Home Screen Improvements:

The Home screen has been redesigned so that it permits easy access to selecting a Vehicle, Reading DTCs, viewing Data Stream and performing Special Tests. In order to accomplish this, the following has been done:

- There are now 8 buttons instead of 6 buttons on the Home screen.
- The Home screen is horizontally scrollable via an easy to use swipe gesture.
 - A visual indicator is located underneath the tiles to indicate which page is active.
- An OBD-II button has been added to the Home Screen for quick access to Global OBDII functions.

First Page:

Transition between First and Second Page:

Second Page:

The "Automated System Test" can be selected from this screen as well as two new quick access buttons: "View Saved Tests" and "View Datastream Recordings":

Home Screen with No Vehicle Selected:

When no vehicle is selected, the vehicle side bar will be updated to indicate this;

OBD II Button Function:

OBD II button pressed and no vehicle selected, Generic OBD II is provided;

Θ

OBD II button pressed with a vehicle selected, Enhanced Global OBD II is available;

- Selecting "OBD-II" will prompt the user for either "Generic" or "Enhanced" OBDII Diagnostics
- Enhanced OBD II enables Mode 6 with simple text descriptions for TIDs, MIDs, CIDs, etc. that are normally only numerical references. No number to text translation required!

	Permit Group for		Q		
-			2		
impala	Global OBDII Global OBDII with Enhanced	Mode 6	Information		
THANSMISSION	Al System DTO Maintenance Testa	Erowaw	Gettings		
OBD-11 Select Vehicle	Wed, 29 Oct 2014		4°F 🙈		
	t D				

OBD II button pressed with a vehicle selected, but vehicle does not support Enhanced Global OBD II;

- Selecting "OBD-II" will clear out your selected vehicle and load up the "Generic OBDII" screen.
- If the OBD-II button is selected before the Communications is ready, you will see the following message:

New Functionality on Home Screen:

A new "View Datastream Recordings" button is available from the second page of the Home menu. It provides access to recorded Data Stream files without requiring the user to enter Data Stream. This option is available with and without a vehicle loaded.

• Selecting "View Data Stream Recordings" pops up a menu with the list of available recordings to view:

• From this view you can tap on an item to load the selected Data Stream Recording.

Ξ

• You can also delete a Recording by swiping to the left and selecting the "Delete" button:

 Selecting "View Data Stream Recordings" when there are no recordings available will display:

A new "View Saved Tests" provides an easy way to view AST and DTC tests saved using the "Share" SD card.

• Selecting this option will launch the "File picker" view of the "OI File Manager":

<u></u>	sdcard0 10/2/2014 # M	
File		Pick1
	÷	

😬 🕒

- <u>Without an actual SD card loaded</u>, the files can be loaded from the following "emulated" location on the tool:
 - Select the "emulated" folder, then "0" which is represented by the following icon:

Finally, select "data" > "com.bosch.mrst_diagnostics" > "files" > "reports":

- With a SD card loaded, the files can be loaded from the following location on the tool:
 - Select the "home" button, then "extsd" to load any files from the SD card.

Ξ

Custom Data Stream:

Custom Data Stream will be available at the data group selection screen prior to a user waiting for data that they may not need to load.

• A new "Customize" button will be available on every group:

Current	Data Stream	• ••• •		
~	All Data Groups	All Data Streams		
2010	AIR Data	Search all Data Streams	Go	
impala LT35	Automatic Trans	AIR Data	Select Customize	
	CMP Actuator Data	S Volt Reference 1 S Volt Reference 2 A/C Relay Command	S Volt Reference 1 Circuit Status S Volt Reference 2 Circuit Status Mil Indicated Pressure	
ENGME	Cooling/HVAC Data	AIM Pressue sensor AIM Pump Relay Circuit Open Test Statum AIM Pump Relay Circuit Short Wohn Test Status AIR Sutenoid Circuit Short Ground Test Status	Anik Pressure Sentar Vanance Anik Pranp Relay Circuit Shon Ground Test Status Anik Solenoid Circuit Open Test Status Anik Solenoid Circuit Short Volts Test Status	
	Cruise/PTO/Traction Data	Automatic Trans	Select Customize	
	EVAP Data	Accelerator Pedal Position Indicated Angle Brake Pedal Position Signal Engine Load	Barometric Presquie Engine Coolant Temperature Sensor Engine Run Time	

• Selecting "Customize" will navigate the user to live Data Stream, but popup the "Custom Data Stream" selection box before loading the data items. This will allow the user to select which data items to load first:

	Dat	Clear Selection		
	AIRE			
-		C AIR Indicated Pressure	AIR Pressure Sensor	
2010 menunit		Engine Coolant Temperature Sensor	Barometric Pressure	
		Vehicle Speed Sensor	Startup Engine Coolant Temperature	
		Start Up Intake Air Temperature	AIR Pressure Sensor Variance	
		🗆 Engine Run Time	Engine Speed	
		3 / 12 items selected	Close Apply	
		¢		

• Selecting "Apply" on the Custom Data Stream dialog will load only the selected items. When the data items are filtered, the items will be checked and the icon for Custom Data Stream becomes orange:

General Interface Improvements:

In order to support the 8 button Main Menu change, the "Register Now" button was moved to the "Weather Widget" until the user is registered.

In Demo Mode:

Selecting "Click here to register" will bring the user to the Registration Screen and will allow them to complete registration.

Ξ

In Trial Mode:

Selecting "Click here to register" will bring the user to the Registration Screen and will allow them to complete registration.

When Registered, the Weather Widget is visible:

You

Thank you for your patronage!
