OTC's latest scan tool, the Android-based Encore, features more than 30 years of OEM, domestic, Asian and European vehicle information, and a boot time of less than 15 seconds thanks to the powerful Android OS. Additional benefits include an onboard battery, embedded resources AutoDetect, Code-Assist, Symptom-Assist and Repair-Trac and access to the Google Play store. Utilizing wireless capability, technicians can spend more time diagnosing and fixing vehicles without having to leave the vehicle to search for additional information. Encore's 7-in. touch screen recognizes common device commands such as swipe and pinch.
